This question here about kumbhojkar can anybody help me please let me know. A: Try to use MathJax, it would solve your problem. Ref: This invention relates to the field of time programmable integrated circuits, and specifically to the method of programming such a circuit. Programmable read only memories and electrically alterable memories are circuits that can be programmed by the user to store data. The memory is programmed by placing the circuit in a memory mode, providing an input code that identifies the data desired to be stored, and entering an operating mode. Once in the operating mode, the data desired to be stored are entered from an external data source. ba244e880a
